Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-2 & 4-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Forbes et al. (US 6,528,837).

Forbes et al. teach a semiconductor memory device comprising (Fig.2):

A plurality of bit lines (218); a plurality of gates (212) crossing intersecting with said bit lines (Fig.1); a plurality of active areas (204), each of which is connected to one of said bit lines; a plurality of deep trenches, at least one of which communicates with two different active areas which are respectively connected with adjacent two of said bit lines, wherein the cross section of said deep trench communicates with said two different active areas.
